

Getting started

Introduction

SoPay Magento2 payment module provides merchants easy API integration to the payment gateway. It uses the webpage mode API integration where the user is taken to SoPay payment window after successful checkout.

Compatibility

The module is tested on Magento version **2.3.x**

Installation guide

- < Download the module from <https://github.com/CodemakersDK/SoPay-magento2>
 - < Upload module files to app/code/ folder.
 - < php bin/magento module:enable Codemakers_SoPay
 - < php bin/magento setup:upgrade
 - < php bin/magento setup:static-content:deploy
 - < php bin/magento cache:flush
-
- < Go to Stores -> Configuration -> Sales -> Payment methods -> SoPay for settings configuration (see next page).

SoPay
