

Getting started

Introduction

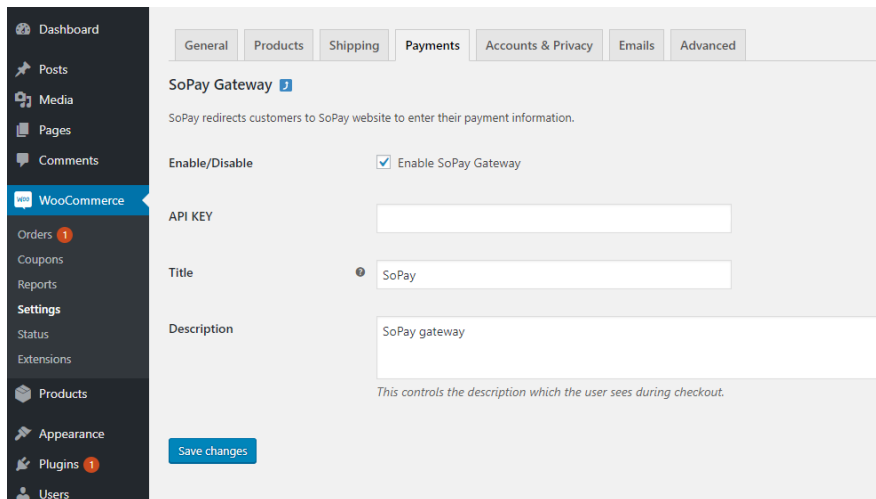

SoPay WooCommerce payment module provides merchants easy API integration to the payment gateway. It uses the webpage mode API integration where the user is taken to SoPay payment window after successful checkout.

Compatibility

The module is tested on Wordpress version **5.2.x** and WooCommerce **v.3.6.x**

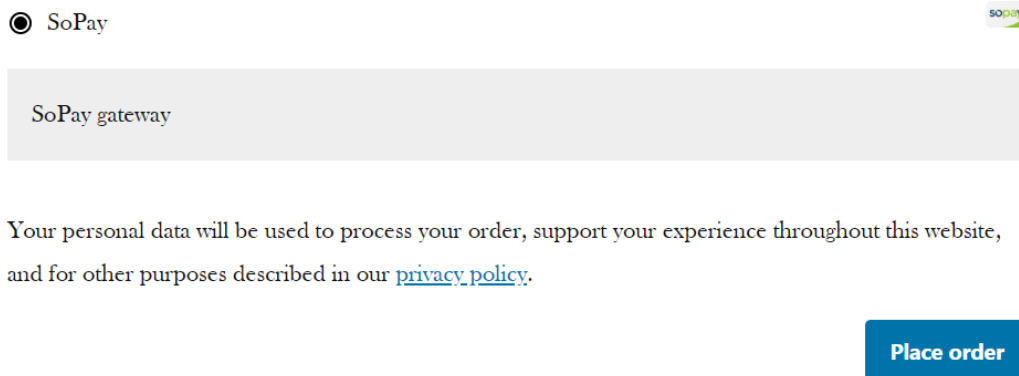

Installation guide

- < Go to Plugins -> Add new and search for SoPay WooCommerce plugin (or upload the .zip file).
- < Install and activate.
- < Go to WooCommerce -> Settings -> Payments -> SoPay Gateway -> Manage for settings configuration.

The screenshot shows the WordPress dashboard with the WooCommerce Payments settings page. The 'Payments' tab is selected, and the 'SoPay Gateway' is configured. The 'Enable/Disable' section has the 'Enable SoPay Gateway' checkbox checked. The 'API KEY' field is empty. The 'Title' field is set to 'SoPay'. The 'Description' field contains 'SoPay gateway'. A 'Save changes' button is visible at the bottom left of the settings area.

When enabled, assuming the correct API KEY is filled, SoPay payment option should appear as one of the payment methods in WooCommerce checkout.

The screenshot shows the SoPay payment method selected in the WooCommerce checkout process. The 'SoPay' radio button is selected. Below the selection, there is a grey box containing the text 'SoPay gateway'. A small SoPay logo is visible in the top right corner. Below the grey box, there is a paragraph of text: 'Your personal data will be used to process your order, support your experience throughout this website, and for other purposes described in our [privacy policy](#).' At the bottom right, there is a blue 'Place order' button.

Updates

Once updates are released they will appear under Updates in WordPress. Before updating plugins in WordPress it is strongly recommended to do a backup and test the buying flow thoroughly after implementing the updates.
